Background

Wales Animal Health and Welfare Framework (Wales AHWF)

The Wales AHWF was launched in July 2014 and sets out our ten-year overarching plan for making improvements in standards of animal health and welfare, whilst also helping to protect public health and making a contribution to the economy and the environment.

The Framework covers the health and welfare of farmed animals, companion animals, working animals, kept animals involved in sport and aquaculture. Wildlife is also covered where our actions affect their health and welfare or where there is a risk of wildlife transmitting disease to other animals or humans.

The Framework sets out five strategic outcomes:

- Wales has healthy productive animals
- Animals in Wales have a good quality of life
- People trust and have confidence in the way food is produced and the way public health is protected
- Wales has a thriving rural economy
- Wales has a high quality environment

A copy of the plan can be found at the following link;

2019-20 Implementation Plan

The 2019-20 Implementation Plan demonstrates our continued commitment to progress key animal health and welfare priorities despite the uncertainty and increased pressures of ongoing Brexit negotiations.

Our key priorities are outlined under the key themes of Responsible Ownership, Disease Prevention and Disease Eradication, which overarching themes of Animal Health Planning, Biosecurity and Animal Identification.

This year's priorities include taking forward the next phase of the Bovine Viral Diarrhoea (BVD), Sheep scab and Bovine TB Eradication Programmes, as well as continuing to meet statutory obligations to safeguard the food chain and public health and promote responsible ownership.

The scope of the Implementation Plan is wide ranging, but collaborative working will continue to raise animal health and welfare standards and promote healthy Welsh livestock, protect human health, the environment and safeguard the local economy.
